Rent Budget Calculator

Compare planned rent with gross monthly income and one aggregate non-rent expense amount, then review common income-based reference rules.

Annual gross income

60000

Planned monthly rent

1500

Monthly non-rent expenses

900

Enter one aggregate amount. You can include debt, utilities, savings, or other non-rent costs here.

Currency

USD

- **Planned rent as a percentage of monthly gross income**

30.00%

The remaining amount subtracts the visible planned rent and aggregate non-rent expenses. The reference amounts are based only on gross income.

Monthly gross income

$5,000.00

Remaining after planned rent and non-rent expenses

$2,600.00

30% income-based reference amount

$1,500.00

40% income-based reference amount

$2,000.00

3x income-requirement comparison amount

$1,666.67

▸ Check your take-home housing budget

Add bills with different payment periods and see what remains after other commitments and savings.

▾ Plan your one-time move-in costs

Add first rent, prepaid last rent, deposits and setup costs without mixing them into your monthly budget.

Use quoted amounts from your agreement and service providers. Optional items start at zero. This separate worksheet does not copy values from the budgets above or determine which charges are lawful or required.

Total one-time cash to plan for

$3,265.52

Combined estimate, not a statement that all items are due on the same date.

First rent — partial month	$1,064.52
Last month prepaid	$1,500.00
Refundable deposit or bond	$500.00
Optional one-time fees	$40.25
Utility setup costs	$60.75
Moving and other setup costs	$100.00

Recurring monthly rent, separate: $1,500.00. This is not added again to the one-time total. Utilities and other recurring costs belong in the housing budget above.

Monthly rent × 22 days charged ÷ 31 days in the rent month. The partial payment replaces the full first month. Each item is rounded to cents once; the total is the exact sum of those displayed items.

The worksheet stays in this tab; it is not saved. Deposits are cash needed upfront even when potentially refundable. Do not enter the same charge under two categories. No deposit cap, fee requirement, legal due date or future refund is assumed. This is arithmetic, not legal or financial advice. For partial rent under a different basis, use the prorated rent calculator and check the agreement.
