Enter the rent amount for the selected period. Choose a visible currency; USD and CAD are both supported.

Rent to set aside per paycheck

$923.08

Based on annual rent divided by 26 paychecks per year.

Weekly paycheck **$461.54**	Biweekly paycheck **$923.08**
Semimonthly paycheck **$1,000.00**	Monthly paycheck **$2,000.00**

Monthly rent amount **$2,000.00**	4-week rent amount **$1,841.10**	Annual rent **$24,000.00**

▼ Plan for your next rent due date

The annual average above may not cover your next bill in time. Enter your actual dates to divide the amount still needed across the paydays before rent is due.

Using biweekly (every 14 days) pay selected above. All amounts are in USD.

Actual rent payment due (USD)

2000.00

Already saved for this payment (USD)

0

Enter the bill due on your chosen date, including any amount you need to add. A weekly rent equivalent is not a monthly bill.

Next payday

Rent due date

01/08/2027 02/01/2027

Count a payday on the due date — only if the money is available before rent must be paid.

$2,000.00 still needed across 2 paydays.

Reserve the amounts below from each paycheck. This assumes each paycheck can cover its reserve; income and other bills are not assessed.

Would the annual average cover this bill?

Saving $923.08 on each of these 2 actual paydays adds $1,846.16. Including your existing savings, you would have $1,846.16 by 2027-02-01.

$153.84 short of this rent payment.

This check repeats the displayed, cent-rounded annual-average amount from the calculator above. It does not count future paychecks after the deadline or other bills. Changing the actual bill here does not change that annual average.

Reserve schedule for rent due 2027-02-01

Payday	Set aside	Saved total
2027-01-08	$1,000.00	$1,000.00
2027-01-22	$1,000.00	$2,000.00

Monthly pay repeats the day of your next payday. Semimonthly pay uses the two days entered. A day missing from a shorter month moves to month-end; coincident dates count once. Weekly and biweekly pay repeat every 7 and 14 days. Weekends, bank holidays and deposit delays are not adjusted. Check your employer's schedule. Extra cents go to the earliest paydays so the reserves add up exactly. This plan stays in this tab and is included when you print with this section open.

Biweekly means every 14 days; semimonthly means two dates each month. The annual comparison uses 26 and 24 paychecks respectively, while this plan counts the entered dates. Some calendar years contain 27 biweekly paydays. Four-week rent covers 28 days, not a calendar month. Currency changes labels only, not exchange rates. This is a planning estimate, not financial advice.

Sources checked November 13, 2026: CRA common and uncommon pay-period counts; CFPB bill-calendar guidance. These sources explain timing; they do not verify your employer's dates or lease obligations.

Annual payment counts

Rent and pay schedules often use different cycles. These are the yearly counts used for comparison.

Type	Cycle	Payments per year
Rent	Monthly	12
Rent	Every 4 weeks (28 days)	13.04
Rent	Weekly	52.14
Pay	Weekly paycheck	52
Pay	Biweekly paycheck	26
Pay	Semimonthly paycheck	24
Pay	Monthly paycheck	12
